Declaration on the avoidance of greenhouse gases in production

The use of fluorinated greenhouse gases has been regulated since 2015 in **Regulation (EC) No. 517/2014** and was replaced on 11 March 2024 by the new **Regulation (EU) 2024/573** on fluorinated greenhouse gases. The additional implementation rules issued by the European Commission remain valid until new implementation rules are issued.

We hereby confirm that no greenhouse gases are used or released in the production processes of Friedrich Lütze GmbH. Our manufacturing processes have been developed to meet the highest environmental standards and actively contribute to the reduction of emissions.

We attach great importance to sustainability and environmental awareness in all areas of our activities. Compliance with statutory and voluntary environmental regulations is a matter of course for us. By continuously optimising our production processes, we strive for even greater energy efficiency and resource conservation - without the use of climate-damaging gases.

If you would like further information on our environmental measures or production standards, please do not hesitate to contact us.

Best regards,

Friedrich Lütze GmbH

Dimitrios Koutrouvis
General Manager
